TESS™

Automated tension blinds for
any angle and any direction

Residential and smaller projects demand sharp aesthetics, reliability and flexibility. TESS systems are designed to be simple to retrofit, or to integrate into the glazing surround for invisibility when retracted.

INTERNAL SYSTEMS

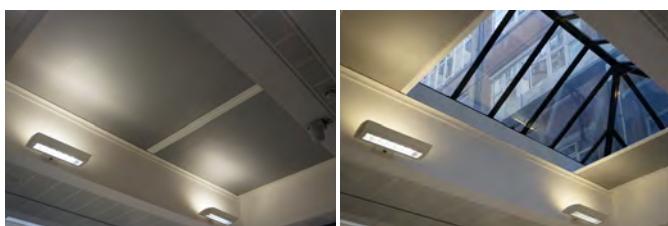

Discrete guide systems and a compact single barrel mechanism keeps the fabric constantly under tension and produces a smooth, quiet travel. Unlimited colour finishes and a wide range of fabrics ensure suitability for any project.

EXTERNAL SYSTEMS

Enjoy the outdoors and control your internal environment safe in the knowledge that our protective headboxes and robust tension mechanism are designed to stand up to the elements.

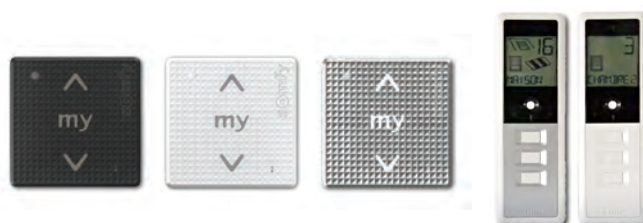

- CE marked to wind class 3+
- Tension maintained in any position and throughout travel

BLACKOUT SYSTEMS

Overcome the issues associated with traditional zip screens. Our tensioned SideLock shades operate inside and out at any angle.

- Self-squaring track system compensates for out-of-square openings
- Fabric held firmly in side tracks
- Lead bar cannot get stuck
- Ultraquiet motor

FABRICS AND CONTROLS

Our fabrics are carefully selected to provide the optimum balance of strength and solar protection whilst providing a variety of colour and texture choices. Visit www.guthriedouglas.com to view the latest collection.

All TESS systems are motorised and compatible with a wide variety of control systems, from hard wired switches, to touch sensitive wireless wall controls and more advanced building management systems with PC or iPad control.
