

venetian blinds

cleaning

Sunlux® blinds are easy to clean by first closing the slats and then dusting them with a feather duster, soft-haired brush or soft cloth.

If the slats are very dirty, it is best to clean them with a damp cloth. You can also use a vacuum cleaner at the lowest setting.

Another option is to gently spray-clean larger surfaces and then allow them to dry well.

WARNING! If the steel headrail of the blind is not completely dry, there is a risk that it will start to rust (with the exception of the bathroom qualities, which come with a galvanised steel head rail).

You can also have the blinds cleaned by a professional cleaning service which uses ultrasonic cleaning technology.
