

Control your shutters, interior blinds and curtains from your smartphone

Ref: 1811589

Description

To program scenarios of presence or absence so as to leave home peacefully and check your home's openings from wherever you are.

Connexoon Window RTS app is a new way to control your shading.

Enjoy the experience of controlling your Somfy-powered motorised solutions from your smartphone, and maximize the many benefits they provide : light management, privacy and convenience.

The Connexoon Window RTS app is accessible and easy to use.

Controlling all your Somfy powered shading and lights from your smartphone has never been so simple.

Somfy motorises and connects all types of solar shading.

With a simple click on your app, control your blinds, shades and curtains. The only thing you have left to do is to relax and enjoy the view.

Our Somfy experts are willing to help you at every step of the installation.

Benefits

Centralisation- all your equipment together - **Open and close all your equipment with a simple click.**

Timer - **Schedule the opening and closing of your equipment at the time and date of your choice, and so simulate your presence- home or away.**

Your own ambiance to play - **In just one click, you can set up a preset ambiance scenario , for example "the evening ambiance", closing the curtains and putting the living room lighting on.**

Individual control - **always available.**
