

Lighting Receiver For RTS Dimming

Ref: 9014281

Description

Associated with an RTS or Tahoma transmitter (on / off function), it allows you to control a lamp individually. It is compatible with the whole range of Somfy RTS transmitters, recommended usage with Telis RTS for dimming. It is also compatible with lamps of adjustable light (see lamp manufacturer instructions), within the required minimum power indicated below. It has the possibility of the “favorite” position.

Blind Solutions

Benefits

- Light can be easily controlled from different locations (with several RTS controls)
- Easily adjust outdoor lights intensity (façade, garden, gate, floor, swimming pool etc)
- Discreet integration, indoor or outdoor.
- Reduce energy consumption with prerecorded 50% “my” position.

Technical Specifications

Radio Frequency	433,42 MHz
Power Supply	230 V / 50 Hz
Index Protection Rating	IP 54
Operating Temperature	-20°C / +60°C
Electronic Insulation	Class II
No. of Programmable RTS Control Points	12 Maximum
Compatibility	All RTS control points with 3 buttons (Up, My, Down) and scroll
Size	52 x 24 x 40mm
